DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-19, drawn to a non-volatile memory device, classified in class 365, subclass 185.33.

Group II. Claims 20-24, drawn to a computer system including computer circuitry, classified in class 435, subclass 6.

2. The inventions are distinct, each from the other because of the following reasons: The inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different with product or (2) that the product as claimed can be made by another and materially different with a process (MPEP § 806.05(f)). In the instant case, a computer system including computer circuitry coupled to a memory device with an interface coupled to the matrix other materially different process such as a non-volatile memory device such as flash type incorporating a memory cell matrix.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Paul F. Rusyn on 01 September 2005 to discuss the restriction issue of this application, but was unable to reach.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined though the requirement be traversed (37 CFR 1.143),
